PFAS (Per- and polyfluoroalkyl substances)

Manufacturer Declaration for Grape Bags (Primary grape packaging)

Per- and polyfluorinated alkyl substances (hereafter abbreviated as PFAS) are a group of extremely persistent chemicals that are used in many consumer products. PFAS are used in products because they can, for example, increase oil and water repellency or withstand high temperatures.

Hydix Packaging limited hereby declares that all Hydix packaging products do not contain PFAS.

Hydix Packaging does not directly purchase any PFAS.

Hydix Packaging products have been manufactured without the intentional use of PFAS.

Hydix Packaging has processes and procedures in place to ensure that our suppliers meet our expectations. We have communicated our requirements to our suppliers to ensure that PFAS are not used in our products. We have subsequently obtained declarations from our suppliers confirming their commitment and upstream due diligence. Hydix Packaging is diligently working to ensure that our supply chain is and remains free of PFAS. Please contact us if you have any further questions.
